Alexandria, Virginia 22313-1450

**PETITION TO MAKE SPECIAL**

Applicant hereby petitions to "Make Special" the above identified application and request that the application be advanced out of turn for examination under the provisions of 37 CFR § 1.102(d).

1. Consistent with the provisions of MPEP 708.02(VIII)(A), the \$130.00 fee required under 37 CFR § 1.17(h) is attached herewith. Any additional fee required herewith may be deducted from Deposit Account No. 50-0238.

2. In support of this Petition to Make Special, applicant makes the following statements:

(a) The subject application is a United States national phase application made in relation to PCT Application No. PCT/DK2004/000775 filed on November 8, 2004. The subject application was filed with claims 1-69. However, during the international phase of the subject PCT application, claims 12-25 and 32-69 were cancelled and pending claims 1-11 and 26-31 were amended and renumbered 1-17.

04 FC:1464

130.00 OP

A Preliminary Amendment filed herewith in relation to the U.S. national phase application cancels all pending claims in favor of newly presented claims 70-88, the subject matter of which corresponds to amended and renumbered claims 1-17.

In view of the foregoing, applicant submits that, consistent with the provisions of MPEP 708.02(VIII)(B), all pending claims are directed to a single invention.

(b) Consistent with the provisions of MPEP 708.02(VIII)(C), applicant further submits that a pre-examination of this subject matter was made in the form of a December 12, 2005 PCT International Preliminary Report on Patentability, a copy of which is attached. Applicant further submits a copy of the published version of the subject PCT application with an International Search Report. Additionally, the subject matter of the originally filed PCT claims were the subject of a private search initiated by the inventor. The results of these prior pre-examinations reflected in an Information Disclosure Statement (IDS) filed herewith.

(c) Applicant also submits for the convenience of the Office, as required by MPEP 708.02(VIII)(D), a copy of each document identified in the attached IDS.

(d) Per MPEP 708.02(VIII)(E), a detailed description of the references deemed most closely related to the pending claims is contained in a first part in the attached PCT International Preliminary Report on Patentability.

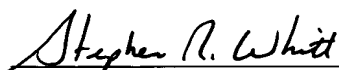

In a second part, applicant offers the following comments related to the references identified in the private search. U.S. Patents 6,749,012; 6,668,911; and 6,725,682, and published U.S. Patent Application US2004/0105232 are deemed most closely related to subject matter of the pending claims. This having been noted, none of the references taken singularly or collectively suggests or discloses a "cooling system" (per claim 70) having the claimed combination of features including a "pump . . . compris[ing] an impeller mechanically integrated with a pump rotor . . .[and] submerged in the cooling

liquid . . . ." For at least this reason, the pending claims are deemed distinct over the identified art.

In view of the foregoing, applicant submits that the subject U.S. national phase application should be made special.

Respectfully submitted,

Date: May 5, 2006
